**Enrollment Request
& Response**

Ver/Rel 004010

	Summary of Changes
July 20, 2001	Initial Release
August 7, 2002	Version 1.1 Issued
	Added a REF*AJ segment (Utility Account Number for ESCO/Marketer) per June 21, 2002 order.
	The Field Descriptions Page was replaced with an updated version.
	The Front Matter Notes regarding ‘Effective Date’ were changed to reflect the business process rules regarding reinstatement adopted in an order issued on May 29, 2002. The list of documents provided under “Companion Documents’ was also expanded to include the Reinstatement Implementation Guide and Business Process documents.
	Modified the Front Matter Notes regarding ‘Secondary Services’ to remove an erroneous reference to a REF*TZ segment and to clarify the use of the NM1 detail loop for an accept response to a secondary request for consumption history/gas profile. An NM1 loop is required in an accept response to an enrollment request (primary request) but is never sent in an accept response to a secondary request for consumption history/gas profile.
	Modified the segment notes for the following segments to distinguish between the use of each segment in the 814 transaction sent in response to an enrollment request versus the response to a secondary request for consumption history/gas profile data: N1*8R (Customer), N3/N4 (Service Address), N1*BT (Name for Mailing), N3/N4 (Mailing Address), REF*93 (Fee Approved/Fee Applied), REF*11 (E/M Customer Account Number), REF*45 (Previous Utility Account Number), REF*65 (Meter Cycle Code), REF*BF (Bill Cycle Code), REF*BLT (Bill Presenter), REF*PC (Bill Calculator), REF*NR (Current Budget Billing Status), REF*PGC (Partial Participation Portion), REF*SU (Customer on Life Support), REF*VI (Gas Pool ID), REF*GC (Gas Capacity Assignment/Obligation), REF*GS (Gas Supply Service Option), REF*ALC (Human Needs Indicator), REF*SPL (ISO Location Based Marginal Pricing Zones), REF*RP (Portion Taxed Residential), DTM*150 (Assigned Service Start Date), AMT*DP (Tax Exemption Percent), AMT*RJ (Commodity Price), AMT*KZ (Electric Capacity Assignment), and all segments contained in the NM1 Loop.
	Modified the element notes for REF03 in the REF*65 (Meter Cycle Code) and REF*BF (Bill Cycle Code) segments to clarify that this element is required in an accept response to an enrollment request when the data sent in REF02 is insufficient to describe both when and how frequently meters are scheduled to be read and/or bills are scheduled to be rendered per the document issued October 2, 2001.
	Clarified use of the REF03 element in the REF*TU (Use Time of Day) segment and element notes per document issued October 2, 2001.

	Summary of Changes (Continued)
November 26, 2002	Version 1.2 Issued
	<ul style="list-style-type: none"> Added a new AMT segment (AMT*FW) to permit ESCO/Marketers to send fixed charge information as well as rates or rate codes when the bill option requested is Utility Rate Ready consolidated billing.
March 17, 2004	Version 1.3 Issued
	<ul style="list-style-type: none"> Added code values to the 02 element in the REF*TU segment to enable Orange & Rockland Utilities, Inc. and Consolidated Edison of New York, Inc. (or other utilities at their option) to describe in more detail in an Accept Response transaction, the type of electric usage data ESCOs can expect to receive in either an 867HU or 867MU transaction. Added AMT*9M and AMT*9N to enable ESCOs to transmit customer's tax rate information when the bill option requested is Utility Rate Ready consolidated billing and the Utility requires ESCOs to provide this data in an Enrollment transaction. When different tax rates are applicable to portions of the customer's service i.e. when a REF*RP segment is present in a Request transaction, it will be necessary to send both the 9M (residential tax rate applicable to a portion of the service) and the 9N segment (commercial tax rate applicable). Notes regarding the attributes of "R" elements were added to the Front Matter notes.
May 17, 2006	Version 2.0 Issued
	<ul style="list-style-type: none"> The "All meters per Account" section of the Front Matter Notes is revised to indicate that an ESCO/Marketer may separately enroll the un-metered electric service for accounts in Orange & Rockland's service territory where both metered and un-metered electric service are present on the account. To separately enroll the un-metered service the REF03 element must be present in the REF*12 (Utility Account Number) segment. The "Cross Referencing Request and Response Transactions" section of the Front Matter Notes is revised to clarify the use of various segments/elements in an Enrollment Accept Response transaction when this transaction is not preceded by an Enrollment Request transaction sent by the E/M. The "Fees" section of the Front Matter Notes is deleted. Prior to November 21, 2003 fees could be assessed for requests for history data under specific conditions. To accommodate fees, a REF*93 (Fee Approved/Fee Applied) segment was required to be sent in the LIN loop containing requests for historic usage (HU) or a gas profile (GP) to indicate whether the E/M was willing to pay a fee for the data if one was applicable. Under the current Uniform Business Practices fees may no longer be assessed for satisfying EDI requests for consumption history.
	<ul style="list-style-type: none"> References to Niagara Mohawk or NMPC throughout the document were revised to refer to National Grid.

	Summary of Changes (Continued)
	<ul style="list-style-type: none"> The element notes for BGN06 in the BGN Segment are revised to indicate that this element may be populated with the text 'MANUAL' in an Enrollment Accept Response transaction when there is no corresponding Request transaction, for example, when a customer participating in an ESCO Referral Program is enrolled by the utility and the Response is being sent to provide the assigned ESCO with the customer's account details. An additional example was also added to the BGN segment notes.
	<ul style="list-style-type: none"> An N106 element is added to the N1*8R (Customer) segment to for use by utilities in Enrollment Accept Response transactions to identify the enrollment as an ESCO Referral Program enrollment.
	<ul style="list-style-type: none"> A PER segment is added to the N1 (Customer) Loop to enable utilities that enroll customer's participating in ESCO Referral Programs with an ESCO to transmit the customer's telephone number in an Accept Response transaction.
	<ul style="list-style-type: none"> The FNA code (Fee Not Authorized) is deleted from the list of possible reject reason codes in the REF*7G segment (Reject Response Reasons) and the REF*93 (Fee Approved/Fee Applied) segment is deleted from the standard. Fees are no longer being assessed for consumption history provided via EDI.
	<ul style="list-style-type: none"> A REF03 element is added to the REF*12 segment (Utility Account Number) for use on Enrollment Requests sent to, or received from, Orange & Rockland Utilities when the transaction pertains to enrolling the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account.
	<ul style="list-style-type: none"> The segment notes for the REF*BLT (Bill Presenter) and REF*PC (Bill Calculator) were revised to clarify the content of these segments for the Single Retailer Model in National Fuel Gas' service territory and to omit references to RG&E since Single Retailer is no longer offered in that service territory.
	<ul style="list-style-type: none"> The notes for the REF*NR (Current Budget Billing Status) segment is also revised to omit reference to Rochester Gas & Electric's use of the Single Retailer model.
	<ul style="list-style-type: none"> A REF*LF (E/M Late Fees) segment is added at the account level to enable E/Ms to communicate in Enrollment Request transactions sent to National Fuel Gas whether the utility should calculate and assess late fees on E/M charges for the account being enrolled. This segment pertains to the Utility Rate Ready bill option only.
	<ul style="list-style-type: none"> The notes for the REF*SU (Customer on Life Support) segment is revised to omit reference to Rochester Gas & Electric's use of the Single Retailer model.
	<ul style="list-style-type: none"> The REF*ALC segment (Human Needs Customer) notes are revised to indicate that this segment is required by National Grid only on gas enrollment requests for non-residential customers.

	Summary of Changes (Continued)
	<ul style="list-style-type: none"> • An AMT*BD (E/M Budget Plan Balance) and an AMT*B5 (E/M Budget Plan Installment Amount) segments are added for use in Enrollment Request transactions sent to National Fuel Gas to communicate a customer’s budget plan installment and pre-existing budget plan balance when the customer's bill option is Utility Rate Ready billing and a REF*NR segment is present in the Request transaction.
	<ul style="list-style-type: none"> • The AMT*RJ (Commodity Price), AMT*FW (E/M Fixed Charge) and the REF*RB segment notes are revised to accommodate Enrollment Accept Response transactions associated with ESCO Referral Program enrollments initiated by the utility. The AMT*RJ and AMT*FW segments may contain zeros or dummy codes in Response transactions. The usage attribute for the REF*RB (ESCO Rate Code) segment in an Enrollment Accept Response transaction is changed from 'Not Used' to 'Conditional' so that National Grid may send this segment in an Enrollment Accept Response transaction for ESCO Referral Program enrollments.
October 23, 2014	Version 2.1 Issued
	<ul style="list-style-type: none"> • Adding these new segments from Case - 12-M-0476. <ul style="list-style-type: none"> ○ REF*IJ (Industrial Classification Code), ○ REF*TX (Utility Tax Exempt Status), ○ REF*TDT (Account Settlement Indicator), ○ REF*YP (NYPA Discount Indicator), ○ REF*SG (Utility Discount) ○ DTM*AB2 (ICAP Effective Dates) ○ AMT*8B (Future ICAP Tag) ○ DTM*AB4 (Future ICAP Tag Effective Dates) • Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary. • Removed references to ESCO Referral Program • Replaced references to Marketer and E/M with ESCO.
April 7, 2015	Version 2.2 Issued
	<ul style="list-style-type: none"> • Added code SP to N1 Name (Customer) to enable Service Portability. • Clarifying revisions to ESCO Service Tax Rate related segments. • Correct the note for the AMT Monetary Amount (ICAP) segment to remove an 814 Change oriented phrase.
July 24, 2015	Version 2.3 Issued
	<ul style="list-style-type: none"> • Added code HUL to the REF Reference Identification (Response Information or Warnings) segment to notify the ESCO that no usage data to be reported or exchanged the PTD*FG loop in the 867HU transaction. • Added codes EM and FX to the PER Administrative Communications Contact (Customer Phone Number) segment to support utility optional exchange of Customer email addresses and facsimile numbers with ESCOs.

NY 814 Enrollment Request & Response

	<ul style="list-style-type: none"> Revised Notes for DTM (ICAP Effective Dates), DTM (Future ICAP Effective Dates), AMT (ICAP) Segments and AMT (Future ICAP) Segments.
	<ul style="list-style-type: none"> Added PER Administrative Communications Contact (Customer Phone Number) Segment to N1*BT loop Removed obsolete Scenario 6 examples Errata - Corrected acronym for North American Industry Classification System
January 29, 2016	Version 2.4 Issued
	<ul style="list-style-type: none"> Modification to REF Reference Identification (Gas Capacity Assignment/Obligation) Segment to correspond to Orders issues in Case No. 07-G-0299. Addition of Ref. Des. AMT03 to AMT Monetary Amount (Future ICAP) Segment to indicate presence of Special Program Adjustment Indicator. Updated gas switching timeline reference to 10 business days. Errata <ul style="list-style-type: none"> Addressed incorrect segment name in Detail: section. Generalized identities in examples.
June 30, 2016	Version 2.5 Issued
	<ul style="list-style-type: none"> Update to conditionality of REF Reference Identification (Previous Utility Customer Account Number) segment.
March 31, 2017	Version 2.6 Issued
	<ul style="list-style-type: none"> Update to conditionality of REF Reference Identification (Meter Cycle Code) segment. Modifications to support 867 MIU/HIU transactions. Addition of REF Reference Identification (Public Aggregator) segment.
October 31, 2017	Version 2.7 Issued
	<ul style="list-style-type: none"> Inclusion of changes to address errata since filing of Version 2.6 in REF*1P segment.
April 30, 2018	Version 2.8 Issued
	<ul style="list-style-type: none"> Addition of REF Reference Identification (APP Status) to communicate Customer APP Status in the Enrollment Response. Elimination of references to NY Billing Agency model. References to Single Retailer Model changed to ESCO Consolidated Billing, where appropriate.
May 31, 2019	Version 2.9 Issued
	<ul style="list-style-type: none"> Modifications to REF~PC segment regarding ESCO Combined Billing. Optional REF*KY added to indicate whether the account has associated generation.

	Notes pertaining to the use of this document
Purpose	<ul style="list-style-type: none"> This 814 Enrollment Transaction Set will be used to enroll or switch a customer, and to request secondary services coincident with that customer's enrollment. These standards are based on the ASC X12 Ver/Rel 004010 standard and related UIG guidelines.
One account per 814	<ul style="list-style-type: none"> Each transaction may contain only one account for one commodity (i.e. electric, gas, etc.). If a customer takes both electric and gas bundled service from the utility under a single account number, and the ESCO supplies both electric and gas, two 814 enrollment requests must be submitted – one for the switch of electric service and another for the switch of gas service.
All meters per account	<ul style="list-style-type: none"> Except where a utility supports separate enrollment of the un-metered electric service for accounts, when a customer enrolls with an ESCO for their electric service, all electric meters (and/or un-metered electric service) on the customer's account will be enrolled with that supplier. Similarly, an enrollment with the same (or a different) supplier for gas service, will result in the enrollment of all gas meters with that supplier. Where a utility supports separate enrollment of the un-metered electric service for accounts, when both metered and un-metered electric service is present on an account, an ESCO may separately enroll (or drop) the un-metered service on that account by transmitting the REF03 element in the REF*12 (Utility Account Number) segment.
Multiple requests per commodity per account	<ul style="list-style-type: none"> This 814 Transaction Set can accommodate more than one action request per commodity per account. Each request should be in a separate LIN loop but the request for enrollment (LIN05 = CE) is considered the primary request and should be placed first in the transaction. Refer to the LIN segment in this document for a better understanding of primary and secondary services. The secondary requests reflected in this implementation guide are requests for actual history data for the customer being enrolled or a request for a gas profile for a customer being enrolled for gas service.

NY 814 Enrollment Request & Response

<p>Cross referencing Request and Response transactions</p>	<ul style="list-style-type: none"> • In most instances, the id sent in the BGN02 element in the BGN segment in a request must be returned in the BGN06 element of the BGN segment sent in a Response transaction. There must be one response LIN for each request LIN sent. It is possible, for example, to accept an enrollment request (LIN05 = CE) but reject the secondary request for history data (LIN05 = HU). The response to each LIN loop on the request must be uniquely identified on the response with the same identification sent in the request LIN01. Responses may be created and sent at different times in different 814 transactions, but all LINs must be responded to within the time limits set by the Commission in the Uniform Business Practices. • In Enrollment Accept Response transactions for which there is no corresponding Enrollment Request transaction, the BGN06 element in the BGN segment will be populated with the word "MANUAL" in lieu of the BGN02 id from a Request transaction.
<p>Validation Fields</p>	<ul style="list-style-type: none"> • Validation field is the customer's utility account number (with check digit, if included).

<p>Effective Date</p>	<ul style="list-style-type: none"> • The effective enrollment date for a customer should not be sent in 814 Enrollment Requests. The effective enrollment date for an account is determined by the Utility and will be returned in an Enrollment Accept Response transaction. Customers will be enrolled with a supplier coincident with the date of the customer’s next regularly scheduled meter read date or the first of the month for gas, provided that the suppliers request has been received and processed by the Utility at least 5 business days (10 business days for gas) in advance of this date and the customer has not rescinded the pending enrollment. • Valid enrollment requests that do not comply with the 5 business (10 business days for gas) requirement may not be rejected; the customer may be enrolled on the next succeeding meter read date for that customer or the first of following month for gas (if a special read has NOT been requested) provided that the customer has not rescinded the pending enrollment request. The <i>Reinstatement Business Process</i> document should also be reviewed for a description of factors that may affect the determination of the effective date for an enrollment. • A customer may be enrolled with an ESCO on an off cycle date but these requests are not currently being processed via EDI. Arrangements for an off cycle enrollment date should be made directly with the Utility and will only be granted subject to the requirements of that Utility’s tariffs.
<p>Secondary Services</p>	<ul style="list-style-type: none"> • The secondary requests reflected in this implementation guide are a request for history data (LIN05 = HU) or a request for a gas profile (LIN05=GP). • When the enrollment request (LIN = CE) is rejected, all secondary services requested coincident with that enrollment will also be rejected. • LIN05 = GP is a secondary service request for a gas profile for the customer being enrolled. A gas profile is a weather-normalized forecast for a twelve-month period for the customer being enrolled. Gas profiles are not supported by all Utilities (see Conditional Data Segments below). When this request is accepted, the ESCO will receive an 814 Accept Response transaction and the gas profile data will be provided in an 867HU transaction. • LIN05 = HU is a secondary service request for history data for the customer being enrolled. When this request is accepted, the ESCO will receive an 814 ‘accept’ response transaction and summarized data on usage for the most recent 12 month period (or the life of the account, if shorter) for the customer being enrolled in an 867 HU transaction. • The REF*MT (Measurement Type and Reporting Interval) and REF*TU (Use Time of Day) segments in the NM1 loop may be used to describe the type(s) of usage a meter is capable of measuring. An NM1 loop will only be returned in an 814 response transaction accepting the enrollment request. • The REF*TU segment would not be used in a response to a gas enrollment request and would only be sent in a response to an electric enrollment request when either the REF03 element in the REF*MT segment is “COMBO” or electric usage is being measured for multiple time periods in a day on the account being enrolled.

	<ul style="list-style-type: none"> • Although data sent in a REF*MT segment may indicate that a meter is capable of measuring usage in intervals, such as 15 or 30 minutes, no interval data will be returned in an 867HU transaction in response to an HU request. Requests for interval data on customer accounts must be sent in a separate 814-request transaction and not as a secondary request on an enrollment transaction. Arrangements for receipt of interval data, and usage data in excess of 12 months, must be made with the applicable utility since this data may not be returned on an 867 transaction. • A request for consumption history that is not coincident with a request for enrollment is addressed in another implementation guide (see <i>TS 814 Consumption History Request & Response</i>).
<p>Single Retailer Model</p>	<ul style="list-style-type: none"> • There are some significant differences in the required segments for an enrollment request (and related secondary services) and responses where the Single Retailer Model has been implemented for retail access. These differences have been noted in the notes and gray box text in the individual data segments in this implementation guide.
<p>Data Element Attributes</p>	<ul style="list-style-type: none"> • Data elements whose X12 attribute type is ‘R’ (see the AMT segments for examples) are treated as real numbers. Real numbers are assumed to be positive numbers and a minus (-) sign must precede the amount when a negative number is being sent. Real numbers do NOT provide for an implied decimal position; therefore a decimal point must be sent when decimal precision is required. Note that in transmitting real numbers it is acceptable, but not necessary, to transmit digits that have no significance i.e. leading or trailing zeros.
<p>Conditional Data Segments</p>	<ul style="list-style-type: none"> • There are minor differences in the extent to which specific data elements are supported by each Utility and/or whether they are applicable to both electric and gas services. These differences have been noted, for the most part, in the data dictionary associated with this implementation guide. • Where a utility provides gas profile data, if the LIN05 = GP and the Utility does not support gas profiles, the Utility will return the default history data, for the account being enrolled, on an 867 (i.e. up to 12 months of usage, or the life of the account).
<p>Definitions</p>	<ul style="list-style-type: none"> • The term Utility or LDC (Local Distribution Company) is used in this document to refer to the local gas or electric distribution company, i.e. the entity providing regulated bundled commodity service. The term ESCO is used in this document to refer to either a gas or electric supplier. The principal parties involved in this Transaction Set 814 implementation guide are: <ul style="list-style-type: none"> ➤ The end-use customer (Code 8R) ➤ The Utility (LDC) (Code 8S) ➤ The Supplier (ESCO or ESCO) (Code SJ).
<p>Rejection vs. Acceptance with Status Reason code</p>	<ul style="list-style-type: none"> • A warning/informational code is different than a Rejection Reason code. The warning code is used to give additional information to the receiving party (an FYI). If an 814 Request does not contain a segment required by the recipient Utility and/or a segment contains incorrect data, some Utilities will reject the transaction while others may accept the transaction and send a warning in their 814 response. Refer to the

	<p>data dictionary associated with this implementation guide for further clarification.</p>
<p>Companion Documents</p>	<ul style="list-style-type: none"> • All of the applicable business rules for New York are not necessarily documented in this implementation guide. Accordingly, the following documents should be reviewed where further clarification is needed: <ul style="list-style-type: none"> ➤ <i>Enrollment Business Processes document</i> ➤ <i>TS 814 Enrollment Request and Response Data Dictionary</i> ➤ <i>TS 814 Reinstatement Request & Response Implementation Guide</i> ➤ <i>Reinstatement Business Processes Document</i> ➤ <i>TS 814 Change (Account Maintenance) Implementation Guide</i>

Implementation Guideline Field Descriptions

Segment: **REF** Reference Identification (Utility Customer Account)

Position: 050

Loop:

Level: Heading

Usage: Optional (Must Use)

Max Use: 1

Purpose: To specify identifying information

Syntax Notes:

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

Semantic Notes:

- 1 REF04 contains data relating to the value cited in REF02.

Comments:

This section shows the X12 Rules for this segment but the Usage and Max Use fields will also reflect NY rules. For Usage, "Optional (Must Use)" means that this segment is Optional for X12, but is required in NY. "Optional (Dependent)" means Optional for X12, but use is conditional in NY. The gray boxes below should also be reviewed for additional NY Rules.

This section displays the NY Rules for implementation of this segment.

...ent number assigned to the customer is used for validation and must be present on all

One or more examples. ...ns.

REF~12~011231287654398

This section displays the NY Rules for implementation of this segment.

Data Element Summary

	<u>Ref Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>X12 Attributes</u>
Mand.	REF01	128	Reference Identification Qualifier 12 Billing Account REF02 contains the Utility-assign number for the customer.	M ID 2/3
Must Use	REF02	127	Reference Identification Utility assigned customer account The utility account number must be spaces or non-alphanumeric charac n on a bill, for	AN 1/30

This column documents differences between X12 and NY use for each data element:

Mand. (Mandatory) – Required by X12
 Must Use – Required by NY
 Cond. (Conditional)
 Optional

These columns show the X12 attributes for each data element:

M = Mandatory
 O = Optional
 X = Conditional

AN = Alphanumeric
 N# = Implied Decimal
 ID = Identification
 R = Real
 DT = Date (CCYYMMDD)

1/30 = Minimum 1, Maximum 30

814 Enrollment Request and Response

Functional Group ID=**GE**

Introduction:

This standard is for Trial Use contains the format and establishes the data contents of the General Request, Response or Confirmation Transaction Set (814) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to request actions to be performed, to respond to a request for actions to be performed or to confirm information related to actions performed.

Notes:

This guideline is limited to defining the required and optional information needed to satisfy a request for enrollment, a response accepting the enrollment request, a response rejecting the enrollment request, and the requests and responses for secondary services that may be requested in conjunction with the enrollment request.

E-1			Examples		

Transaction Set Notes

1. The N1 loop is used to identify the parties to this transaction.
2. The LIN loop is used to transmit account level data.
3. The NM1 loop is used to transmit meter level data.

Segment: **ST** Transaction Set Header
Position: 010
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Syntax Notes:
Semantic Notes: 1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
Notes: Request: Required
Response: Required
ST~814~0001

Data Element Summary

	<u>Ref.</u>	<u>Data</u>	<u>Name</u>	<u>Attributes</u>
	<u>Des.</u>	<u>Element</u>		
Mand.	ST01	143	Transaction Set Identifier Code	M ID 3/3
			814 General Request, Response or Confirmation	
Mand.	ST02	329	Transaction Set Control Number	M AN 4/9

Segment: **BGN** Beginning Segment
Position: 020
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of a transaction set
Syntax Notes: 1 If BGN05 is present, then BGN04 is required.
Semantic Notes: 1 BGN02 is the transaction set reference number.
 2 BGN03 is the transaction set date.
 3 BGN04 is the transaction set time.
 4 BGN05 is the transaction set time qualifier.
 5 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Notes:
 Request: Required
 Response: Required
 Request: BGN~13~20000301145101~20060301
 Response: BGN~11~20000402072434~20060302~~~20060301145101
 Response: BGN~11~20000402072434~ 20060302~~~MANUAL

Data Element Summary

	<u>Ref.</u> <u>Des.</u>	<u>Data</u> <u>Element</u>	<u>Name</u>	<u>Attributes</u>
Mand.	BGN01	353	Transaction Set Purpose Code 11 Response 13 Request	M ID 2/2
Mand.	BGN02	127	Reference Identification A unique transaction identifier number assigned by the originator of this transaction. The BGN02 element from the requesting transaction is returned in the BGN06 element in the response to that request.	M AN 1/30
Mand.	BGN03	373	Date The date the transaction was created by the sender's application system in the form CCYYMMDD.	M DT 8/8
Cond.	BGN06	127	Reference Identification This element is not used on a request transaction but is required in a response transaction. If a customer enrollment is initiated by an ESCO via transmission of an 814 Enrollment Request transaction, the BGN06 element in a Response transaction must contain the transaction id in the BGN02 element in the corresponding Request transaction. When a customer is enrolled with an ESCO by the utility and there is no corresponding Request transaction, for example the BGN06 element will be populated with text (the word "MANUAL") in lieu of the BGN02 id from a Request transaction. Semantic Notes:

Notes:

Request:	Optional
Enrollment Accept Response:	Conditional

The Customer's Phone Number, Facsimile Number and/or Email Address may be sent in an Accept Response transaction, at the discretion of the Utility. If the Enrollment Accept Response does not provide an item, the ESCO should presume the utility has no information to provide.

The format for phone/facsimile numbers is area code + 7 digit number (xxxxyyzzzz). In its Utility Maintained EDI Guide, a utility will indicate if it accepts Enrollment Requests and/or sends Enrollment Responses containing the Customer's Telephone/Facsimile number and/or Email Address.

Enrollment Requests: Not Used

Enrollment Accept Responses: Required for non-residential accounts

Required for non-residential accounts where the customer receives a commodity discount from the utility or a delivery discount that is dependent upon purchase of commodity from the utility. Further, the indicator should be set to "N" in cases where all non-residential customers in a rate class or service receive the same discount or when the delivery discount is portable, i.e. it applies whether the customer purchases commodity from the ESCO or the utility.

Notes:

Enrollment Requests: Not Used
 Enrollment Accept Responses: Required

The Utility Tax Exempt Status signifies the existence of exemptions and/or certifications, if any, held by the utility, that are used to bill the customer for utility services. The indicator is informational only; the utility's exemption is not transferable to the ESCO to bill the customer for ESCO services. The ESCO should not rely upon the utility's information for billing purposes and should contact the customer to obtain necessary information consistent with the requirements of the New York State Department of Taxation & Finance and any applicable laws.

Mand.	REF01	128	Reference Identification Qualifier NH Rate Card Number REF02 contains the Utility specific rate code that references the service class and rates applicable to the service delivery point(s) identified in the NM109 element.	M ID 2/3
Must Use	REF02	127	Reference Identification Utility Rate code as found in the tariff. (This code can be used to retrieve rates from a utility's web site.)	X AN 1/30

Segment: **REF** Reference Identification (Rate Sub Class)
Position: 130
Loop: NM1 Optional (Dependent)
Level: Detail
Usage: Optional (Dependent)
Max Use: 1
Purpose: To specify identifying information
Syntax Notes:

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

Semantic Notes:

- 1 REF04 contains data relating to the value cited in REF02.

Notes: Enrollment Accept Responses: Conditional
 Other Requests/Responses: Not Used

If a rate subclass is applicable to the account being enrolled, this segment must be sent in Enrollment Accept Response transactions.

Segment: **REF** Reference Identification (Measurement Type and Reporting Interval)
Position: 130
Loop: NM1 Optional (Dependent)
Level: Detail
Usage: Optional (Dependent)
Max Use: 1
Purpose: To specify identifying information
Syntax Notes: 1 At least one of REF02 or REF03 is required.
 2 If either C04003 or C04004 is present, then the other is required.
 3 If either C04005 or C04006 is present, then the other is required.
Semantic Notes: 1 REF04 contains data relating to the value cited in REF02.
Notes: Enrollment Requests: Conditional.
 Enrollment Accept Responses: Required
 Other Requests/Responses: Not Used.

This segment is sent to describe the measurement types and reporting intervals associated with the service delivery point(s) identified in the NM109 segment. It may be sent on an Enrollment Request when the bill option is Utility Rate Ready consolidated billing and the ESCO wants to associate different rate codes (see REF~RB) with different measurement types and/or reporting intervals. When an Enrollment Request is being accepted, this segment is used by the Utility to describe the type of consumption and reporting interval for each service delivery point(s) identified in the NM109 segment for the account being enrolled.

REF~MT~KHMON
 REF~MT~TDMON
 REF~MT~COMBO
 REF~MT~KH030
 REF~MT~KHTOU

Data Element Summary

Mand.	Ref.	Data			Attributes
	Des.	Element	Name		M ID 2/3
	REF01	128	Reference Identification Qualifier	MT	
				Meter Ticket Number	
				Meter type.	
				Used to identify the type of consumption measured by a meter and the interval between measurements or the type of consumption and reporting interval applicable to the un-metered service delivery points on the account.	

The type and reporting interval for consumption measurements are described in a five-character field. The first two characters are used to describe the type of consumption. The last three characters describe the reporting interval.

The literal "COMBO" is sent in the REF02 element of this segment when the service delivery point(s) identified in the NM109 are capable of providing different measurement types AND/OR measurements for more than one time period in a day.

When the REF~MT contains "COMBO" multiple REF~TU segments may be necessary to describe the types of consumption being measured for the service delivery point(s) identified in the NM109 element. A REF~TU segment must also be sent, even when there is only one type of consumption being measured, when multiple time periods are being measured during a day.

When only one measurement type is applicable to the metered or un-metered service points identified in the NM1 segment, the REF02 in this segment should contain one of the following codes as the first two characters to describe the type of consumption:

K1 Kilowatt Demand (kW)
 K2 Kilovolt Amperes Reactive Demand (kVAR)
 K3 Kilovolt Amperes Reactive Hour (kVARH)
 K4 Kilovolt Amperes (kVA)
 K5 Kilovolt Amperes Reactive (kVAR)
 KH Kilowatt Hour (kWh)
 HH Hundred Cubic Feet (CCF)
 TZ Thousand Cubic Feet (MCF)
 TD Therms

The following codes are sent as the last three characters of the REF02 element to document the interval capabilities of the metered or un-metered service delivery point(s) identified in the NM1 segment. If that capability is not known then the interval that should be reported is the scheduled meter reading interval.

BIM Bi-Monthly
 DAY Daily
 MON Monthly
 QTR Quarterly
 TOU Time of Use

001-999 - Reporting Intervals. (015 indicates 15 minute intervals, 060 indicates 60 minute intervals, etc.)

Segment: **REF** Reference Identification (Use Time of Day)
Position: 130
Loop: NM1 Optional (Dependent)
Level: Detail
Usage: Optional (Dependent)
Max Use: >1
Purpose: To specify identifying information
Syntax Notes:

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

Semantic Notes:

- 1 REF04 contains data relating to the value cited in REF02.

Notes: Enrollment Accept Responses: Conditional
 Other Requests/Responses: Not Used

This segment is NOT applicable to gas enrollments but may be applicable to an electric enrollment when usage for the electric account being enrolled is measured for multiple consumption types and/or multiple periods in a day.
 A REF~TU segment must be sent to describe the types of consumption being measured for the service delivery point(s) identified in the NM109 element, when the REF~MT segment contains "COMBO" OR when multiple consumption periods are being measured during a day (e.g. on peak, off peak, etc.).

REF~TU~51~KHMON
 REF~TU~41~K1BIM

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
Mand.	REF01	128	Reference Identification Qualifier	M ID 2/3
			TU	Trial Location Code
				REF02 will contain a code that indicates the time of day for which measurements are obtained.
Mand.	REF02	127	Reference Identification	M AN 1/30
		41	Off Peak	At the utility's option, this code is used to designate Small Time of Use Off Peak Energy.
		42	On Peak	At the utility's option, this code is used to designate Small Time of Day On Peak Energy.
		43	Intermediate Peak	
		45	Per Gallon	
		49	Summer On Peak	
		49	Mist	
		50	Predominant	
		50	Winter On Peak	
		50	Predominant	
		51	Winter Mid Peak	
		51	Total/Totalizer	Use "51" when: The total of all consumption of the indicated type for all periods recorded by the meter indicated in the NM1 segment will be reported in the 867 transaction. For example, if only the total usage for a metered service point will be sent in the 867, the REF~TU should contain "51" on the Accept Response. When consumption will be reported by intervals on the 867 transaction, for example, off peak, on peak, and total

	then multiple REF~TU segments must be present on the Accept Response with codes of "41", "42" and "51" for the applicable metered service point.
	At the utility's option, this code is used to designate Total Energy or Total Billed Demand.
57	Boarded or Blocked
	Summer Total
58	Planned
	Winter Total
73	Low to High
	Summer Off Peak

	High Tension On Peak Energy
85	High
	High Tension Off Peak Energy
86	Budgeted
	Low Tension On Peak Energy
87	Forecast
	Low Tension Off Peak Energy
88	Adjusted
	Low Tension Total Energy
89	Allocated
	Low Tension Primary Demand
90	Increasing
	Low Tension Secondary Demand
91	Stable
	Low Tension Transmission Demand
92	Declining
	High Tension Total Energy
93	Previous
	High Tension Primary Demand
94	Potential
	High Tension Transmission Demand

Segment: **REF** Reference Identification (ESCO Rate Code)

Position: 130

Loop: NM1 Optional (Dependent)

Level: Detail

Usage: Optional (Dependent)

Max Use: 1

Purpose: To specify identifying information

Syntax Notes:

- 1 At least one of REF02 or REF03 is required.
- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

Semantic Notes:

- 1 REF04 contains data relating to the value cited in REF02.

Notes:

Enrollment Requests:	Conditional
Other Requests:	Not Used
Responses:	Conditional

This segment is required in an Enrollment Request transaction when the bill option is Utility Rate Ready consolidated billing (utility calculates the charges appearing on the ESCO portion of the customer’s consolidated bill) and the ESCO will use rate codes (rather than prices) to communicate the rate to be applied in calculating its customers' charges.

REF~RB~R23X40
REF~RB~1150100

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
Mand.	REF01	128	Reference Identification Qualifier RB Rate code number	M ID 2/3
				REF02 Contains the ESCO Rate Code that will indicate the prices to be applied to this service point.
Must Use	REF02	127	Reference Identification	X AN 1/30
				An alphanumeric rate code indicating a table of rates used to calculate net charges associated with this metering point.

This identifier is the same identifier used in ST02 that started this transaction set.

EXAMPLES

These examples are presented for illustrative purposes only. Although they are syntactically correct with respect to the published transaction standard for TS814 Enrollment Request & Response, it should be understood that these examples reflect certain assumptions regarding optional and conditional data segments in this standard. Accordingly, these examples are not necessarily indicative of the manner in which a specific Utility or ESCO would map a specific transaction.
